

JinkoSolar Joins the RE100 and EP100 Green Initiatives

September 25, 2019

NEW YORK, Sept. 25, 2019 /PRNewswire/ -- JinkoSolar Holding Co., Ltd. (the "Company," or "JinkoSolar") (NYSE: JKS), one of the largest and most innovative solar module manufacturers in the world, today announced that it has committed to the RE100 and EP100 initiatives. These global campaigns are led by The Climate Group, an international non-profit organization working closely with powerful business networks and governments to bring innovative solutions to scale.

The RE100 initiative brings together the world's most influential companies committed to 100% renewable power. To reach this global climate goal and drive a low carbon economy, each company has committed to source 100% of the electricity used across their global operations from renewable sources. The EP100 initiative brings together a growing group of energy-smart companies committed to doing more with less.

As part of the pledge, JinkoSolar will power all of its solar plants and global operations with 100% renewable power by 2025. By 2030, the Company will deploy an energy management system across its operations and improve its energy productivity by 30% when compared to 2016. To work towards these goals, JinkoSolar has also signed up for the EP100 Cooling Challenge to increase the energy efficiency of its cooling operations.

Mr. Kangping Chen, Chief Executive Officer of JinkoSolar, commented, "We care about long-term sustainability just as much as we care about the quality of our products. We continuously encourage our suppliers to source renewable electricity and support green practices. As one of the leading companies in the renewable energy sector, it is important to be responsible role models for a sustainable future. The core of our business is to be green and we are thrilled to be the first global solar manufacturer becoming a member of the RE100 and EP100 initiatives."

Yuming Hui, China Director, The Climate Group, said, "It's fantastic to see JinkoSolar leading by example on cleaner, smarter energy use and investing in solar power and energy efficient cooling. By joining RE100 and EP100, JinkoSolar is putting itself on the map in a busy week for global climate action and demonstrating what can be done. The private sector has a vital role to play in accelerating China's clean economy, and we hope many more companies will follow suit."

About RE100

Led by The Climate Group in partnership with CDP, RE100 is a collaborative initiative bringing together the world's most influential businesses committed to 100% renewable power. Renewables are a smart business decision, providing greater control over energy costs while helping companies to deliver on emission reduction goals. RE100 members, including Global Fortune 500 companies, have a total revenue of over US\$5.4 trillion and operate in a diverse range of sectors – from information technology to automobile manufacturing. Together, they send a powerful signal to policymakers and investors to accelerate the transition to a clean economy. RE100 participating companies include Apple, Google, Facebook, Bloomberg, ebay, H&M, IKEA, Coca-Cola European Partners, Burberry, 3M, AkzoNobel, Allianz, AXA, HSBC, Barclays, Citi, and Danone. About EP100

The Climate Group's global EP100 initiative brings together a growing group of energy-smart companies committed to doing more with less to improve their energy productivity. By integrating energy efficiency into business strategy, these leading companies are driving tech innovation and increasing competitiveness while delivering on emissions reduction goals – inspiring others to follow their lead. EP100 is led by The Climate Group in partnership with the Alliance to Save Energy as part of the We Mean Business coalition, and is delivered in association with the World Green Building Council's Net Zero Carbon Buildings Commitment.
