# JinkoSolar Introduces High Efficiency "WING" Series Modules

May 15, 2012

## Improved ergonomic design ideal for ground mount systems and rooftop projects

SHANGHAI, May 15, 2012 /PRNewswire-Asia/ -- <u>JinkoSolar</u> Holding Co., Ltd. ("JinkoSolar" or the "Company") (NYSE: JKS), one of the world's leading vertically integrated solar power product manufacturers, today unveiled its "WING" series solar modules. The sleek, lightweight product line marks a significant upgrade to the company's already robust lineup of premium solar modules for residential and commercial applications.

WING series modules are marked by improved ergonomic design and aesthetics. Thinner than any similar product on the market at only 30 to 40 millimetres thick, the 0.5 kilogram lightweight modules are optimized for ground mount systems, yet also ideal for rooftop applications. These size and weight improvements increase packing density to allow for 6 solar modules rather than 3 per box, thus enabling a significant reduction in transportation costs.

Additional design improvements include rounded corners to make the installation process safer and more convenient. Junction boxes applied to WING series are potted junction box with IP 67 protection standard. This effectively protects key module components from water damage and extreme conditions by using a large area of copper for heat dissipation.

Along with improvements to the physical structure, the WING series also achieves an increase in efficiency. The power output of a 60-cell polycrystalline solar module can reach up to 260W with a conversion efficiency of 16.05%. All modules in the series received IEC 2400Pa Mechanical Load Test Certificate and passed 5400Pa Mechanical Load Test in Jinko's UL WTDP lab. The WING modules yielded superior stress analysis results comparative to older products.

"JinkoSolar continues to strive be better than we were yesterday," said Kangping Chen, CEO of JinkoSolar. "We are committed to providing our customers with the most cost-efficient products in an increasingly competitive market, and we are confident that our new WING modules will deliver a superior experience. JinkoSolar works hard to ensure added value and better ROI for our customers and investors."

## About JinkoSolar

JinkoSolar Holding Co., Ltd. (NYSE: JKS) is a fast-growing, vertically integrated solar power product manufacturer with cost efficient operations based in Jiangxi Province and Zhejiang Province in China and sales and marketing offices in Shanghai, China, Singapore, Munich, Germany, San Francisco, U.S., Queensland, Australia, Ontario, Canada, Bologna, Italy, Montpellier, France and Zug, Switzerland. JinkoSolar has built a vertically integrated solar product value chain with an integrated annual capacity of approximately 1.2GW each for silicon ingots, wafers, solar cells and solar modules as of December 31, 2011. JinkoSolar distributes its photovoltaic products to a diversified customer base in the global PV market; including Italy, Germany, Belgium, Spain, the United States, France, Eastern Europe, China and other countries and regions.
