

Building Your Trust in Solar

JinkoSolar Breaks World Records for both P-type and N-type PV Module Power

May 18, 2018

SHANGHAI, May 18, 2018/PRNewswire/ -- JinkoSolar Holding Co., Ltd. (NYSE: JKS) (the "Company," or "JinkoSolar"), a global leader in the solar photovoltaic industry, today announced that the 60P version of its P-type PV module peak power broke the world record again with power exceeding 370W and the N-type PV module peak power reaching 378.6W. Both records were certified by the TUV Rheinland (Shanghai) Co., Ltd.

P-type mono modules contain JinkoSolar's world record high efficiency cells. These cells combined with low electricity loss technology, which reduces the module internal resistance and improves its fill factor, allowing peak power to exceed 370W. N-type dual glass modules, leverage passivating contact technology achieve high efficiency with front-side peak power reaching 378.6W. With its excellent bifacial factor, this N-type module can improve outdoor power output per unit dramatically.

Dr. Jin Hao, Vice President of JinkoSolar commented, "Every technological breakthrough results from a strong pioneering spirit and constant search for excellence. Companies with strong independent innovation capabilities are able to grasp opportunities in fiercely competitive markets and establish leadership. JinkoSolar always applies advanced technologies to large-scale applications rapidly to accelerate the popularization of PV applications."

About JinkoSolar Holding Co., Ltd.

JinkoSolar (NYSE: JKS) is a global leader in the solar industry. JinkoSolar distributes its solar products and sells its solutions and services to a diversified international utility, commercial and residential customer base in China, the United States, Japan, Germany, the United Kingdom, Chile, South Africa, India, Mexico, Brazil, the United Arab Emirates, Italy, Spain, France, Belgium, and other countries and regions.
