

Building Your Trust in Solar

JinkoSolar Receives PID Certification from TÜV Nord for Entire Portfolio of PV Modules

May 30, 2018

SHANGHAI, May 30, 2018 /PRNewswire/ -- JinkoSolar Holding Co., Ltd. (NYSE: JKS) (the "Company," or "JinkoSolar"), a global leader in the solar PV industry, announced that its entire portfolio of PV modules has passed the Potential Induced Degradation ("PID") resistance test under the conditions of 85 Degrees Celsius/85% relative humidity ("double 85") as required by TÜV Nord's IEC TS 62804-1 standards.

As a global leader in the solar PV industry, JinkoSolar recognizes the harm brought about by PID and has devoted resources over the course of its history towards increasing the PID resistance of its entire portfolio of modules. In August 2012, JinkoSolar became the first PV company to pass the anti-PID test under double 85 conditions. In January 2013, JinkoSolar unveiled the world's first double 85 certified PID-free solar module. In November 2016, JinkoSolar became the first PV module manufacturer to guarantee anti-PID under double 85 conditions. In July 2017, JinkoSolar became the first PV module provider to guarantee that all its standard mass produced PV modules meet IEC62804 double anti-PID standards.

Mr. Kangping Chen, JinkoSolar's Chief Executive Officer, commented, "Through our relentless efforts over the years, we are pleased to announce that all our regular mono and polycrystalline PV modules meet TÜV Nord's IEC TS 62804-1 double 85 anti-PID standards. I believe this demonstrates our leadership position when it comes to developing and promoting global PV standards. We have made great progress in improving our system voltage and in developing anti-PID technology in order to guarantee that our products operate reliably under the toughest conditions and ensure the investment return for our customers and the constant and stable output of our PV systems."

About JinkoSolar Holding Co., Ltd.

JinkoSolar (NYSE: JKS) is a global leader in the solar industry. JinkoSolar distributes its solar products and sells its solutions and services to a diversified international utility, commercial and residential customer base in China, the United States, Japan, Germany, the United Kingdom, Chile, South Africa, India, Mexico, Brazil, the United Arab Emirates, Italy, Spain, France, Belgium, and other countries and regions.
