Mr. Kangping Chen, JinkoSolar's Chief Executive Officer commented, "We had an overall strong quarter as we continue to build a diversified foundation for long-term sustainable growth. We are efficiently executing our strategy across all segments of our business as we benefit from the strong growth momentum gained by expanding our module and downstream businesses. Total revenues during the second quarter reached US\$516.2 million, representing an increase of 31.6% over the same period in 2014 and 16.4% sequentially. Module shipments to third parties reached 823 MW, exceeding the high-end of our third party shipment guidance for the second quarter in a row."

"Solar power output during the second quarter also exceeded our expectations by reaching 203 GWh, up approximately 75.8% sequentially while generating RMB177.9 million in revenue. With the seasonal effects of Chinese New Year behind us and new projects ramping up to full capacity, we expect this higher-margin business to generate an increasing share of the profits during the second half of 2015."

"We connected 108 MW of solar projects to the grid during the quarter which brings the total capacity of connected projects to 725 MW, and are on track to hit our target of 600 MW - 800 MW of connected capacity in 2015."

"Global solar demand remains robust, allowing us to build upon our leadership position in a number of key and new emerging markets. We are well positioned in China as the market leader to benefit from the expected strong demand during the second half of 2015. We also made substantial progress in the U.S. where shipments increased by 115% sequentially, In the Asia Pacific region, we increased our market share substantially in Thailand. Shipments to Japan and the UK returned to normal levels following the year-end rush last quarter but still remain very active and show promising signs of growth. Turkey and Switzerland in the non-EU region as well as emerging market such as Brazil and Chile all show great potential. We continue to seek new opportunities as we diversify our customer portfolio and geographic presence"

"Our rapid business growth is supported by diversified financing channels at both the corporate and project levels. At the corporate level, in addition to our existing close relationships with domestic commercial banks, we secured loans from The Export-Import Bank of China for our Malaysian production facility and doubled JinkoSolar US's credit limit with Wells Fargo. On the project level, we secured large project credit lines from Mingsheng Bank and Ping An Bank as we strengthen our financing capabilities with additional financial institutions. Such strong support from financial institutions demonstrates their confidence in our ability to execute our growth strategies across different businesses and geographies."

"In conclusion, I am pleased with the progress we made across the entire business. The support we are receiving at both corporate and project levels from our diversified financing channels will continue to serve as the foundation for our sustainable long-term growth. Combined with the steady expansion of our downstream business, industry-leading technology and diversified geographic presence, we believe that our growth prospects look increasingly promising."

Second Quarter 2015 Financial Results

Total Revenues

Total revenues in the second quarter of 2015 were RMB3.2 billion (US\$516.2 million), representing an increase of 16.4% from RMB2.7 billion in the first quarter of 2015 and an increase of 31.6% from RMB2.4 billion in the second quarter of 2014. The sequential and year-over-year increase in total revenues was mainly attributable to the increases in shipments of solar modules and electricity revenues from solar projects.

During the second quarter of 2015, revenues from downstream solar power projects were RMB177.9 million (US\$28.7 million), an increase of 74.2% from the first quarter of 2015 and an increase of 191.6% from the second quarter of 2014, of which electricity revenue accounted for RMB177.0 million (US\$28.6 million). The increase in solar power project revenues was primarily due to the increase in number and capacity of the Company's solar projects. Gross profit for solar power project revenues was RMB111.6 million (US\$18.0 million) during the second quarter of 2015, representing a gross margin of 62.7%.

The Company has entered into certain sales contracts with retainage terms (the "Retainage Contracts") since the second half of 2012, under which customers were allowed to withhold payment of 5% to 10% of the full contract price as retainage for the specified period which generally ranges from one year to two years (the "Retainage Period"). The Company does not recognize such retainage until the customers pay it after the Retainage Period expires. The total amounts of retainage under the Retainage Contracts that were not recognized as revenue were RMB17.3 million (US\$2.8 million) and RMB7.7 million for the second and the first quarter of 2015, respectively. During the second quarter of 2015, the Company received retainage payment of RMB14.4 million (US\$2.3 million) and recognized it as revenue. As of June 30, 2015, the cumulative amount of retainage that had not yet been recognized as revenue was RMB204.5 million (US\$33.0 million).

Gross Profit and Gross Margin

Gross profit in the second quarter of 2015 was RMB663.6 million (US\$107.0 million), compared with RMB558.5 million in the first quarter of 2015 and RMB550.3 million in the second quarter of 2014.

Gross margin was 20.7% in the second quarter of 2015 compared with 20.3% in the first quarter of 2015 and 22.6% in the second quarter of 2014. In-house gross margin, which relates to the Company's in-house silicon wafer, solar cell and solar module production, was 26.3% in the second quarter of 2015, compared with 24.1% in the first quarter of 2015 and 25.4% in the second quarter of 2014. The sequential and year-over-year increases were mainly due to the continued cost reduction of solar modules and the rapid increase of electricity revenues.

Income from Operations and Operating Margin

Income from operations in the second quarter of 2015 was RMB237.0 million (US\$38.2 million), compared with RMB230.0 million in the first quarter of 2015 and RMB251.6 million in the second quarter of 2014. Total operating expenses in the second quarter of 2015 were RMB426.6 million (US\$68.8 million), an increase of 29.9% from RMB328.5 million in the first quarter of 2015 and an increase of 42.9% from RMB298.6 million in the second quarter of 2014. The sequential increase in operating expenses was mainly due to an increase in shipping and warranty costs associated with increased module shipments. The year-over-year increase in operating expenses was mainly due to increases in shipping and warranty costs and stock-based compensation expenses.

Total operating expenses excluding non-cash charges, including stock-based compensation and changes in allowance for doubtful accounts were RMB422.8 million (US\$68.2 million) in the second quarter of 2015, compared to RMB344.8 million in the first quarter of 2015 and RMB288.9 million in the second quarter of 2014.

Exchange gain/loss, Net

The Company recorded an exchange gain of RMB15.2 million (US\$2.4 million) including change in fair value of forward contracts in the second quarter of 2015. The Company had a net exchange loss of RMB26.9 million in the first quarter of 2015 and RMB4.8 million in the second quarter of 2014. The Company recognized a loss from a change in fair value of convertible senior notes of RMB56.0 million (US\$9.0 million) which was offset by a gain from a change in fair value of capped call options of RMB5.3 million (US\$0.9 million). Loss from change in fair value of convertible senior notes was primarily due to the increase in price of the Company's stock during the second quarter of 2015.

Equity in income of affiliated companies

The Company recognized equity income from affiliated companies of RMB3.9 million (US\$0.6 million) in the second quarter of 2015 as a result of its share of profits for solar projects held by affiliated companies.

Income Tax Expense / (Benefit), net

The Company recorded an income tax benefit of RMB1.8 million (US\$0.3 million) in the second quarter of 2015, compared with income tax expense of RMB19.9 million in the first quarter of 2015 and income tax expense of RMB20.9 million during the second quarter of 2014. The sequential and year-over-year changes were mainly due to the additional deduction in R&D costs approved by the local tax bureau in the second quarter of 2015.

Net Income and Earnings per Share

Net income attributable to JinkoSolar Holding Co., Ltd.'s ordinary shareholders in the second quarter of 2015 was RMB76.4 million (US\$12.3 million), compared with RMB51.0 million in the first quarter of 2015 and RMB138.2 million in the second quarter of 2014.
