Mr. Kangping Chen, JinkoSolar's Chief Executive Officer commented, "JinkoSolar's growth story continues to progress strongly and I couldn't be prouder of our very strong performance during the quarter in which solar module shipments, total revenue and gross profit all hit record highs. Module shipments during the quarter were 4,538 MW, an increase of 36% sequentially and 25% year-over-year. Total revenues during the quarter were US\$1.37 billion, an increase of 27% sequentially and 23% year-over-year, while gross profit hit US\$250 million. We are benefitting from the rapid expansion of our mono wafer production capacity during the second half of 2019 and our industry-leading integrated cost structure, which has ideally positioned us to drive growth throughout full year 2020 where we expect solar module shipments to increase by approximately 35%."

"2019 marked a significant milestone in our corporate history in which we successfully completed our transformation into the most competitive solar manufacturer in the world. The efficient execution of our strategy throughout the second half of the year allowed us to rapidly transition our operations and production facilities from poly to mono while steadily increasing the proportion of products produced through our fully integrated manufacturing process. This allowed us to rapidly begin mass production of our innovative solar products and distribute them to our growing customer base who are eager to benefit from the increased efficiency of our products. We also further refined our management processes to further optimize operational efficiency across our business and supply chain, which significantly reduced manufacturing costs."

"A number of emerging markets are flourishing with many of them approaching gigawatts levels, which we believe reflects the direction the market is headed with demand diversifying globally instead of concentrating in a few large markets. We believe global demand in 2020 will continue its strong growth momentum with newly added installations expected to reach 140GW to 150GW, an increase of around 20% year-over-year. New installations in Europe doubled in 2019 while ASPs in the U.S. remained high as a result of constrained supply. The subsidy in China for 2020 is finalized earlier in the year than was done last year which will allow more time for project development planning and installation and is expected to result in a higher overall completion rate. A number of projects from 2019 will likely be delayed into 2020 which we expect will result in total installations in China reaching 40GW to 50GW for full year 2020, an increase of about 50% year-over-year. With grid parity rapidly approaching in many markets, the long-term growth potential of the industry is rapidly opening up."

"The outbreak of COVID-19 across China affected certain raw materials supply and logistics during the first quarter of 2020, causing some module shipments be postponed to the second quarter of 2020. In response to the outbreak, we implemented a number of initiatives to ensure business continuity, including ensuring the safety and health of our employees and minimizing the impact of the outbreak on production and delivery by stocking up on critical raw materials and optimizing production and logistics. Our supply chain and logistics were temporarily affected by the outbreak early in the first quarter of 2020 but has improved significantly. Our current capacity utilization rate has already recovered to 100%. We estimate that approximately 400 MW to 500MW of our solar module shipments in the first quarter will be postponed to the second quarter, causing shipments in the second quarter to increase significantly. We believe our shipments and capacity expansion plans for the full year 2020 will not be impacted by the outbreak."

"The competitiveness of products in the market today is driven by the technologies they incorporate. We increased our investments into R&D in 2019 which resulted in our products breaking world records of cell efficiency and module output twice in June 2019 and once in January 2020. We believe our ability to consistently drive technological breakthroughs coupled with our expanding production capacity for high efficiency products will continue to drive down manufacturing costs."

Fourth Quarter 2019 Financial Results

Total Revenues

Total revenues in the fourth quarter of 2019 were RMB9.53 billion (US\$1.37 billion), an increase of 27.4% from RMB7.48 billion in the third quarter of 2019 and an increase of 23.4% from RMB7.72 billion in the fourth quarter of 2018. The sequential increase was mainly attributable to an increase in the shipment of solar modules, which was partially offset by a decline in the average selling price of solar modules. The year-over-year increase was mainly attributable to an increase in the shipment of solar modules.

Gross Profit and Gross Margin

Gross profit in the fourth quarter of 2019 was RMB1.73 billion (US\$248.5 million), compared with RMB1.59 billion in the third quarter of 2019 and RMB1.13 billion in the fourth quarter of 2018. The sequential increase was mainly attributable to an increase in the shipment of solar modules. The year-over-year increase was mainly attributable to (i) an increase in the shipment of solar modules, (ii) an increase in self-produced production volume by increasing shift toward integrated mono-based high-efficiency products capacity, and (iii) the continued reduction of integrated production costs resulting from the Company's industry-leading integrated cost structure.

Gross margin was 18.2% in the fourth quarter of 2019, compared with 21.3% in the third quarter of 2019 and 14.7% in the fourth quarter of 2018. Excluding the CVD and ADD reversal benefit, gross margin was 18.1 % in the fourth quarter of 2019, compared with 18.5% in the third quarter of 2019 and 13.8% in the fourth quarter of 2018. Excluding the impact of CVD and ADD benefits, gross margin remained essentially flat sequentially. The year-over-year increase was mainly attributable to (i) an increase in self-produced production volume by increasing shift toward integrated mono-based high-efficiency products capacity, and (ii) the continued reduction of integrated production costs, resulting from the Company's industry-leading integrated cost structure.

Income from Operations and Operating Margin

Income from operations in the fourth quarter of 2019 was RMB594.8 million (US\$85.4 million), compared with RMB638.8 million in the third quarter of 2019 and RMB237.4 million in the fourth quarter of 2018. Operating margin was 6.2% in the fourth quarter of 2019, compared with 8.5% in the third

quarter of 2019 and 3.1% in the fourth quarter of 2018. Excluding the CVD and ADD reversal benefits, operating margin in the fourth quarter of 2019 was 6.2%, compared with 5.7% in the third quarter of 2019 and 2.2% in the fourth quarter of 2018.

Total operating expenses in the fourth quarter of 2019 were RMB1.13 billion (US\$163.0 million), an increase of 18.8% from RMB955.0 million in the third quarter of 2019 and an increase of 26.8% from RMB895.1 million in the fourth quarter of 2018. The sequential and year-over-year increases were mainly due to an increase in shipping costs, bad-debt provision on accounts receivable, and impairment loss on property, plant and equipment as a result of the Company's technology transformation in the fourth quarter of 2019 with a total amount of RMB68.3 million.

Total operating expenses accounted for 11.9% of total revenues in the fourth quarter of 2019, compared to 12.8% in the third quarter of 2019 and 11.6% in the fourth quarter of 2018. The sequential decrease was primarily due to a decrease in shipping costs as a percentage of total revenue associated with a higher percentage of shipments to domestic market taking place in the fourth quarter of 2019.

Interest Expense, Net

Net interest expense in the fourth quarter of 2019 was RMB83.8 million (US\$12.0 million), a decrease of 11.7% from RMB94.9 million in the third quarter of 2019 and an increase of 13.2% from RMB74.0 million in the fourth quarter of 2018. The sequential decrease was mainly due to a decrease in interest expense associated with discounted notes receivables in the fourth quarter of 2019. The year-over-year increase was mainly due to (i) an increase in borrowings, (ii) the cessation of interest capitalization on certain completed solar projects, and (iii) issuance of additional convertible senior notes in May 2019.

Exchange (Loss)/Gain and Change in Fair Value of Foreign Exchange Derivatives

The Company recorded a net exchange gain (including change in fair value of foreign exchange derivatives) of RMB77.9 million (US\$11.2 million) in the fourth quarter of 2019, compared to a net exchange loss of RMB130.7 million in the third quarter of 2019 and a net exchange loss of RMB35.1 million in the fourth quarter of 2018. With the rapid increase in overseas orders, the Company increased its foreign currency hedge ratio to hedge against anticipated cash flow denominated in U.S. dollars over the next six months. The Company recorded a gain arising from foreign exchange forward contracts associated with the depreciation of the U.S. dollars against the RMB in the fourth quarter of 2019.

Change in Fair Value of Interest Rate Swap

The Company entered into Interest Rate Swap agreements with several banks for the purpose of reducing interest rate risk exposure associated with the Company's overseas solar power projects. The Company recorded a gain arising from change in fair value of interest rate swap of RMB24.5 million (US\$3.5 million) in the fourth quarter of 2019, compared to a loss of RMB18.1 million in the third quarter of 2019. The gain was primarily due to an increase in long-term interest rates in the fourth quarter of 2019. The Company did not elect to use hedge accounting for any of its derivatives.

Change in Fair Value of Convertible Senior Notes and Call Option

The Company issued US\$85.0 million of 4.5% convertible senior notes due 2024 (the "Notes") in May 2019 and has elected to measure the Notes at fair value. The Company recognized a loss from a change in fair value of the Notes of RMB152.7 million (US\$21.9 million) in the fourth quarter of 2019, compared to a gain of RMB157.1 million in the third quarter of 2019. The change was primarily due to a significant increase in the Company's stock price in the fourth quarter of 2019.

Concurrent with the issuance of the Notes in May 2019, the Company entered into a call option transaction with an affiliate of Credit Suisse Securities (USA) LLC. The Company accounted for the call option transaction as freestanding derivative assets in its consolidated balance sheets, which is marked to market during each reporting period. The Company recorded a gain from a change in fair value of the call option of RMB85.6 million (US\$12.3 million) in the fourth quarter of 2019, compared to a loss of RMB74.2 million in the third quarter of 2019. The gain primarily arose from change in fair value of interest rate swap agreements purchased by Sweihan PV Power Company P.J.S.C. due to an increase in long-term interest rates in the fourth quarter of 2019. Hedge accounting was not applied for the derivative.

Income Tax Benefit / (Expense), Net

The increase was mainly because (i) a JinkoSolar's subsidiary turned a profit in 2019 and utilized corresponding deferred tax assets recognized for tax loss carryforward, and (ii) JinkoSolar's subsidiaries in U.S. with higher income tax rate generated higher profits in the fourth quarter of 2019.

Net Income and Earnings per Share

The increase of interest-bearing debts was mainly due to (i) the issuance of additional convertible senior notes, and (ii) an increase in borrowings.

In November 2019, the Company entered into an agreement to sell two solar power plants in Mexico with a combined capacity of 155 MW to White River Renewables, a Mexican renewable energy company. White River Renewables is jointly sponsored by Riverstone Holdings, an energy and power-focused private investment firm, and White Summit Capital, a Switzerland-based infrastructure investments and asset management firm. The final closing of the transaction is expected to be completed by April 2020. The sale of overseas power plants is consistent with the Company's growth strategy to focus on its solar manufacturing business.

Assets and liabilities related to these two solar power plants were reclassified as assets/liabilities held for sale as of December 31, 2019. convertible senior notes, and stock-based compensation; given these Non-GAAP net income adjustments above are either related to the Company or its subsidiaries incorporated in Cayman Islands, which are not subject to tax exposures, or related to those subsidiaries with tax loss positions which result in no tax impacts, therefore no tax adjustment is needed in conjunction with these Non-GAAP net income adjustments; and
