JinkoSolar Recognized as Top Performer for PVEL's 2022 PV Module Reliability Scorecard for the Eighth Consecutive Time

May 18, 2022

SHANGRAO, China, May 18, 2022 /PRNewswire/ -- JinkoSolar Holding Co., Ltd. (the "Company," or "JinkoSolar") (NYSE: JKS), one of the largest and most innovative solar module manufacturers in the world, today announced that it has been recognized as a Top Performer in the 2022 PV Module Reliability Scorecard published by PV Evolution Labs (PVEL). JinkoSolar is one of only two module manufacturers to have been rated as a Top Performer for eight consecutive times since it was introduced in 2014.

Established in 2012, PVEL's PV Module Reliability Scorecard evaluates modules and manufacturers through its comprehensive Product Qualification Program (PQP), which delivers independent reliability and performance data. Recognition as a Top Performer demonstrates a manufacturer's commitment to product quality.

This has been a year of many milestones for JinkoSolar - the Company became the first to deliver 100 GW of modules globally, ranked number 1 in global shipments (Q1 2022), broke another world record for maximum solar conversion efficiency (for its large-size monocrystalline silicon TOPCon solar cell), and has just been recognized as a PVEL Top Performer for the eighth consecutive time.

"Every year we strive to provide our customers around the globe with high-quality, high-performing, durable products. And in every edition of PVEL's PV Module Reliability Scorecard, we've been listed as a Top Performer. This recognition is the direct result of JinkoSolar's extensive R&D capabilities and our absolute dedication to module reliability and excellence," commented Mr. Nigel Cockroft, General Manager of JinkoSolar (U.S.) Inc.

"We are very excited to be including Jinko in the 2022 Scorecard for a record-setting eight consecutive times," commented Tristan Erion-Lorico, VP of Sales and Marketing at PVEL. "This year's Scorecard is particularly noteworthy, listing 15 different Top Performing Jinko models, three of which achieved this status in every reliability test. We look forward to continued strong results as Jinko continues to innovate."

About JinkoSolar Holding Co., Ltd.

JinkoSolar (NYSE: JKS) is one of the largest and most innovative solar module manufacturers in the world. JinkoSolar distributes its solar products and sells its solutions and services to a diversified international utility, commercial and residential customer base in China, the United States, Japan, Germany, the United Kingdom, Chile, South Africa, India, Mexico, Brazil, the United Arab Emirates, Italy, Spain, France, Belgium, Netherlands, Poland, Austria, Switzerland, Greece and other countries and regions.
