JinkoSolar and ib vogt Partner to Deliver High-Efficiency Tiger Neo Modules for Spain's 513 MWp Segovia Solar Cluster

06/30/2025

MUNICH, June 30, 2025 /PRNewswire/ -- JinkoSolar Holding Co., Ltd. ("JinkoSolar") (NYSE: JKS), one of the largest and most innovative solar module manufacturers in the world, today announced the successful delivery of its high-efficiency Tiger Neo modules to support the construction of Spain's newly inaugurated Segovia solar cluster.

Developed by ib vogt, the large-scale project spans approximately 666 hectares in the Castile and León region and comprises four utility-scale solar parks, one of the country's largest solar developments and a clear example of the central role solar plays in Spain's decarbonization strategy. JinkoSolar's high-efficiency N-type TOPCon modules were deployed across all four sites, delivering a combined 513 MWp of clean, renewable energy generation capacity.

"The Segovia cluster stands as a flagship of what strong partnerships and shared ambition can achieve," said Frank Niendorf, VP Europe at JinkoSolar. "Spain continues to lead Europe's clean energy transition, and we're proud to contribute our high-performance Tiger Neo technology — selected for its superior efficiency, bifacial yield, and long-term reliability. Our integrated supply chain ensured smooth, timely delivery across this milestone project. It also reflects the strength of our collaboration with ib vogt — built on shared values of excellence, trust, and sustainability — and reinforces JinkoSolar's role as a trusted technology partner in Europe's energy future."
