Jinko Solar Invited to Attend the U.S. B20 Summit and Serve as a Core Member of the Energy Task Force

11/10/2026

SHANGRAO, China, Nov. 10, 2026 /PRNewswire/ -- Jinko Holdings Limited ("Jinko Holdings" or the "Company") (NYSE: JKS), today announced that its majority-owned principal operating subsidiary, Jinko Solar Co., Ltd ("Jinko Solar"), a global leader in clean energy technology, was invited to attend the Business 20 (B20) Summit on November 9, 2026, in Washington, D.C. As the only photovoltaic company invited, it participated as a core member of the Energy Task Force, engaging in discussions with leaders from globally renowned companies, international organizations, and business associations on energy issues. This marks the 11th consecutive year that Jinko Solar has been invited to attend the B20 Summit.

The theme of the 2026 U.S. B20 Energy Task Force's recommendations was "Powering global growth through secure, abundant, and affordable energy supply and infrastructure." It calls on Group of Twenty (G20) leaders to collaborate with the private sector to mobilize various forms of investment, support technological innovation, enhance universal access to energy, accelerate the improvement of the global energy system, and achieve long-term sustainable prosperity for both the environment and the economy. It also calls for strengthening global energy security through resource investment and infrastructure development, ensuring an adequate energy supply through a diversified and inclusive energy mix, and addressing the surging demand for electricity driven by artificial intelligence (AI) and the industrial sector by advancing grid modernization.

As a core member of the Energy Task Force and drawing on its large-scale practical experience in the global photovoltaic and energy storage sectors, Jinko Solar put forward five recommendations:

1. Improve supporting financing mechanisms for the sustainable energy transition and optimize supporting investment and financing conditions
2. Promote the overall expansion of the global energy industry chain, particularly the supply of new energy sources such as photovoltaics that can be delivered at greater scale and speed, providing populations across the globe with access to green energy that is affordable and readily accessible
3. Expand and modernize global energy infrastructure with photovoltaics, energy storage, and AI as its green foundation
4. Address the surging electricity demand from the AI sector by advancing projects that integrate computing and power, such as direct green power supply, along with grid upgrades, and establishing a stable investment framework
5. Strengthen climate risk protection for the energy system, with governments and the private sector collaborating to establish unified risk early-warning systems, facilitate the cross-border flow of green electricity, and enable the cross-border flow of electricity using tokens as a new medium, thereby adapting to the new AI-driven power system management model

The B20 Energy Task Force serves as the core platform for energy recommendations from the G20 business community, focusing on key issues such as global energy security and infrastructure development. The recommendations will be submitted to G20 leaders for consideration. As a core member of the Energy Task Force, Jinko Solar contributes its industry expertise and practical experience to discussions on global energy challenges and policy recommendations.

Jinko Solar has been deeply involved in the B20 process for 11 consecutive years. Drawing on its frontline industry practice, it has turned its experience in affordable green energy supply, solar and storage synergy, and the integration of computing and power into actionable projects. In this way, Jinko Solar serves as a bridge between industry and policymakers, contributing to global energy development and international industry collaboration.

About Jinko Holdings Limited

Jinko Holdings (NYSE: JKS) is a holding company combining clean energy industrial operations and strategic investment in emerging technologies. Its industrial foundation is a controlling interest in Jinko Solar Co., Ltd. (SSE: 688223), a global leader in clean energy technology. The Company makes disciplined strategic investments in renewable energy, advanced materials, artificial intelligence, commercial space and other frontier technologies, drawing on its industrial experience and its ability to identify emerging technologies and bring them to commercial scale.

Through Jinko Solar Co., Ltd., the Company distributes its solar products and sells its solutions and services to a diversified international utility, commercial and residential customer base in China, the United States, Japan, Germany, the United Kingdom, Chile, South Africa, India, Mexico, Brazil, the United Arab Emirates, Italy, Spain, France, Belgium, Netherlands, Poland, Austria, Switzerland, Greece and other countries and regions.

Through Jinko Solar Co., Ltd., the Company has over 20 overseas subsidiaries in Japan, South Korea, Vietnam, India, Turkey, Germany, Italy, Switzerland, the United States, Mexico, and other countries, and a global sales network with sales teams in China, the United States, Canada, Brazil, Chile, Mexico, Italy, Germany, Turkey, Spain, Japan, the United Arab Emirates, Netherlands, Vietnam and India, as of June 30, 2026.
