"We are pleased with the improvements in our performance in the second quarter as market conditions remained difficult due to continued module oversupply and global economic weakness. Despite further weakness in our module average selling prices ("ASPs), our gross margin improved sequentially from the first quarter, as our non-silicon cost decreased substantially and rapidly approached our targets for the year." said Kangping Chen, JinkoSolar's Chief Executive Officer. "We have continued to focus on our core business and worked to maintain our industry-leading position in terms of cost structure through improving efficiency without sacrificing the performance and reliability that our high quality modules are known for. JinkoSolar's modules became the first to pass TUV-SUD's stringent potential induced degradation test under 85 degrees Celsius/85% relative humidity conditions this month. As we compete globally, our results in the second quarter also demonstrate the effectiveness of our strategy and commitment to adapt to the different environments and conditions of our diversified markets and locations. For example, in the United Sates, we remain committed to meeting the demand of our customers there, and we have successfully adapted our strategy to mitigate the effects of the anti-dumping measures put in place, to increase our market share and shipments."

"We now have more than 140 customers and are active in 21 countries, which is a testament to our reputation as a reliable partner and the increasing global appeal of our brand. We launched JinkoSolar Priority Solar Club partner program for our strategic customers this past month to further drive our module sales and reward customer loyalty. The success and profitability of our partners is critical to our success and we hope that this program will create stronger partnerships and help us further expand geographically."

"Shipments to Italy and Germany were particularly strong in the second quarter. We continued to diversify away from Western Europe by expanding into new emerging markets. Sales in Eastern Europe continue to show strength as they do in Greece, Canada, Australia, Brazil, Japan and new markets such as Slovenia and Chile are promising. Our sales office in Singapore will allow us to further expand in Southeast Asia, a region where we see great potential in the coming quarters. China remains on track to deliver increasing opportunities as we expand our project development and EPC business there alongside our module sales. This year, we have more than 200 MW of government approved project development in the pipeline, which along with the existing subsidies and current solar market conditions in China, will provide many valuable opportunities and prospects for our downstream project business. Having worked diligently during the first half of the year, we expect to see benefits from these projects as we move into the second half of the year."

"As we expect continued turbulence in the industry, deepening our relationships with customers and maintaining our reputation as one of the most reliable solar module producers remain our top priority. We believe our strong client relationships and reputation will continue to bring us increasing business opportunities as we push forward into the second half of 2012. We plan to continue to manage our business prudently and leverage our industry leading technology and cost structure to seize market opportunities and drive future growth."
