

JinkoSolar Delivers First Distributed Rooftop PV System to Eaton Electric

March 7, 2013

SHANGHAI, March 7, 2013 /PRNewswire/ -- JinkoSolar Holding Co., Ltd. ("JinkoSolar" or the "Company") (NYSE: JKS), a leading global solar power product manufacturer, today announced that its first 100 kWp distributed rooftop photovoltaic ("PV") power generation system for Eaton Electric Co., Ltd. ("Eaton"), was successfully connected to the grid in Shenzhen, China.

JinkoSolar provided 400 pieces high-efficiency PV solar panels for the project which was managed by Eaton and installed on the roof of Santak Electronic Co., Ltd.'s factory. The rooftop PV system covers an area of approximately 1500m² and is expected to produce 100 thousand kWh of power while reducing carbon dioxide emissions by approximately 89,624 tons annually.

In addition to supplying the PV modules, JinkoSolar also takes care of the installation of the project. The installation used a low profile linkage control single-axle tracking system to improve generating capacity and reduce installation time, also ensures that it does not damage the existing waterproof structure. The aluminum alloy structure is ideal for installation in coastal regions where systems are often exposed to extreme humidity and corrosive environmental conditions. The tailor-made monitoring system provides customers with multiple methods to oversee the operation and maintenance of the PV system.

"We are very happy to have developed a strong partnership with Eaton to supply and construct this distributed rooftop PV system," said Mr. Kangping Chen, Chief Executive Officer of JinkoSolar. "This project will act as a shining example of domestic distributed solar PV solution. JinkoSolar, besides being very active and successful in large scale utility projects, will also continue to promote the development of distributed small and medium sized solar projects in China as part of its commitment to creating sustainable PV solutions."

"We are very pleased to partner with one of the PV industry's leaders on this landmark project," said Mr. Wu, Project Manager of Eaton Electric. "Eaton EESS is very pleased to see the connection and commission of the PQ (the Santak) rooftop solar project. To make effective use of solar, wind, hydro and other green energy of nature, is the obligation of the electrical industry practitioners. Eaton EESS is grateful for the efforts of JinkoSolar engineers. We look forward to further building on our relationship with JinkoSolar to implement more high class distributed solar projects in China."

About JinkoSolar

JinkoSolar is a leading solar power product manufacturer with production operations in Jiangxi and Zhejiang Provinces in China and sales and marketing offices in Shanghai, China; Munich, Germany; Bologna, Italy; Montpellier, France; Zug, Switzerland; San Francisco, the United States; Queensland, Australia; Ontario, Canada and Singapore.

JinkoSolar has built a vertically integrated solar product value chain with an integrated annual capacity of approximately 1.2 GW each for silicon wafers, solar cells and solar modules as of September 30, 2012. JinkoSolar distributes its photovoltaic products to a diversified customer base in the global PV market, including Germany, Italy, Belgium, Spain, the United States, France, Eastern Europe, China, India, Japan and other countries and regions.
