JinkoSolar Modules Awarded Dust & Sand Certification by TUV Nord

May 22, 2013

SHANGHAI, May 22, 2013 /PRNewswire/ -- JinkoSolar Holding Co., Ltd. ("JinkoSolar" or the "Company") (NYSE: JKS), a leading global PV solar power product manufacturer, today announced that its solar PV modules have passed TUV Nord's Dust & Sand Certification Test. TUV Nord's certification indicates that JinkoSolar's modules are suitable for installation in desert regions, where a shortage of rain and constant sandstorm scan cause solar PV plants to operate inefficiently.

TUV-Nord's Dust and Sand Certification Test simulates the typical erosion effect of heavy desert sandstorm situation. This endurance testing is critical to determine the reliability and longevity of solar PV panels in real world conditions along their lifetime. "The considerable increase in the number of PV installations in desert regions makes it essential to develop solar modules that can withstand the strong impact of high-velocity sand and avoid the accumulation of dust on the surface of the modules. We pride ourselves on passing the rigorous testing procedures and our ability to produce solar PV panels that reliably deliver the best performance in real world conditions," said Mr. Kangping Chen, JinkoSolar's Chief Executive Officer.

"For our customers, particularly those located in emerging PV markets where JinkoSolar is very active, such as northwest China, Africa, India, South America and the Middle East, TUV Nord's Dust & Sand Certification guarantees that our PV solar modules are durable and well-suited for their harsh desert environments and extreme environmental conditions," added Arturo Herrero, Chief Marketing Officer.

About JinkoSolar

JinkoSolar is a leading solar power product manufacturer with production operations in Jiangxi and Zhejiang Provinces in China and sales and marketing offices in Shanghai and Beijing, China; Munich, Germany; Bologna, Italy; Montpellier, France; Zug, Switzerland; San Francisco, the United States; Queensland, Australia; Ontario, Canada; Singapore; Tokyo, Japan and Cape Town, South Africa.

JinkoSolar has built a vertically integrated solar product value chain with an integrated annual capacity of approximately 1.2 GW each for silicon ingots and wafers, solar PV cells and solar PV modules as of December 31, 2012. JinkoSolar distributes its photovoltaic products to a diversified customer base in the global PV market, including Germany, Italy, Belgium, Spain, the United States, France, Eastern Europe, China, India, Japan, South Africa and other countries and regions.
