

JinkoSolar to Provide DMM with Salt and Mist Resistant Solar Modules for PV Project in Japan

November 7, 2014

SHANGHAI, Nov. 7, 2014 /PRNewswire/ -- JinkoSolar Holding Co., Ltd. ("JinkoSolar" or the "Company") (NYSE: JKS), a global leader in the PV industry, today announced that it has supplied 5MW of highly efficient, salt and mist resistant solar modules to DMM, a Japanese digital content distributor and solar installation company, for a ground mounted solar PV project in Mie Prefecture, Japan. The project has been connected to the grid and is operating.

The project is located approximately 100m from the coastline in Meiwa, Mie Prefecture. Given its location along the coast in central Japan, solar modules used in the project had to be resistant to salt and mist. JinkoSolar's salt and mist resistant modules can be installed in any coastal region and run without interference over a long period of time. The project is expected to generate approximately 5.55 million kWh of electricity annually for 2,500 local households.

"We are excited to be working with DMM to promote the local renewable energy market in Japan," commented Mr. Xiande Li, Chairman of JinkoSolar. "Located along the coast of Mie Prefecture in central Japan, the project required high quality modules that were salt and mist resistance. By selecting JinkoSolar as the module supplier for this project, DMM is demonstrating its confidence in the quality and performance of our modules under harsh environmental conditions."

"We are honored to work with JinkoSolar on this project," said Mr. Zhao guo Sun, Manager of DMM's Energy Division. "We shared a common goal of creating greener environment with renewable energy. We are looking forward to cooperating on other projects in the future."

About JinkoSolar Holding Co., Ltd.

JinkoSolar is a global leader in the solar industry with production operations in Jiangxi and Zhejiang Provinces in China and sales and marketing offices in Shanghai and Beijing, China; Munich, Germany; Bologna, Italy; Zug, Switzerland; San Francisco, the United States; Queensland, Australia; Ontario, Canada; Singapore; Tokyo and Osaka; Japan and Cape town, South Africa.

JinkoSolar has built a vertically integrated solar product value chain, with an integrated annual capacity of 2.3 GW for silicon ingots and wafers, 1.8 GW for solar cells, and 2.8 GW for solar modules, as of September 30, 2014. JinkoSolar sells electricity in China and distributes its solar products to a diversified customer base in the global PV market, including Germany, Italy, Belgium, Spain, the United States, Eastern Europe, China, India, Japan, South Africa, and other countries and regions.
