

Building Your Trust in Solar

JinkoSolar 1500-Volt Eagle Modules Available for Delivery in North America Following UL 1703 Certification

April 27, 2016

SHANGHAI and WILMINGTON, Del., April 27, 2016 /PRNewswire/ -- JinkoSolar Holding Co., Ltd. ("JinkoSolar"), a global leader in the photovoltaic (PV) industry, today announced that its 1500-volt Eagle PV modules, manufactured with its strategic partner DuPont's™ Tedlar® polyvinyl fluoride (PVF) film-based backsheets, have received UL1703 certification by Underwriters Laboratories (UL). Following certification, the modules have immediately become available for use in solar energy installations across North America. With its modules now in the market, JinkoSolar will be able to meet the growing demand for higher-voltage systems, which lower overall costs, reduce levelized cost of energy, and enable a better return on investment.

JinkoSolar's 1500-volt Eagle modules pass potential induced degradation tests at 85 degrees Celsius and 85% relative humidity and are protected by DuPont™ Tedlar® PVF film-based backsheets. The Eagle module is a framed panel compatible with commonly used racking and tracking systems in the North America market. DuPont™ Tedlar® is the only backsheet material proven to protect solar panels in the field for more than 30 years in harsh environmental conditions such as desert, jungle, coastal, and mountain climates.

"DuPont™ Tedlar® PVF film-based backsheets offer the optimal balance of weatherability, adhesion, and mechanical strength--properties required for long module lifetime. They provide extended durability and electrical insulation, which make them ideal components for JinkoSolar's 1500-volt Eagle modules, now poised to accelerate the growth of the North American PV market," said Alex Bradley, Principal Investigator, DuPont Photovoltaic Solutions.

"JinkoSolar has quickly become the brand of choice for utility-scale installations due to our high quality modules and unmatched after sales services. I believe that JinkoSolar's 1500-volt Eagle modules are by far one of the most robust products in the North American market, especially with DuPont™ Tedlar® backsheets. These high quality modules are yet another step in our effort to provide customers with the best technology and proven, reliable, and cost-effective products," said Nigel Cockroft, General Manager of JinkoSolar (U.S.) Inc.

About JinkoSolar Holding Co., Ltd.

JinkoSolar (NYSE: JKS) is a global leader in the solar industry. JinkoSolar distributes its solar products and sells its solutions and services to a diversified international utility, commercial and residential customer base in China, the United States, Japan, Germany, the United Kingdom, Chile, South Africa, India, Mexico, Brazil, the United Arab Emirates, Italy, Spain, France, Belgium, and other countries and regions. JinkoSolar has built a vertically integrated solar product value chain, with an integrated annual capacity of 3 GW for silicon ingots and wafers, 2.5 GW for solar cells, and 4.3 GW for solar modules, as of December 31, 2015.

JinkoSolar has over 15,000 employees across its 5 production facilities in Jiangxi and Zhejiang Provinces, China, Malaysia, Portugal and South Africa, 12 global sales offices in China, Spain, the United Kingdom, the United Arab Emirates, Jordan, Saudi Arabia, Egypt, Morocco, Ghana, Brazil, Costa Rica and Mexico and 11 oversea subsidiaries in Germany, Italy, Switzerland, the United States, Canada, Australia, Singapore, Japan, India, South Africa and Chile.
