## Chairman of JinkoSolar Commented On Landmark Paris Climate Agreement Taking Formal Effect

November 4, 2016

SHANGHAI, Nov 4, 2016 /PRNewswire/ -- JinkoSolar Holding Co., Ltd. ("JinkoSolar" or the "Company"), a global leader in the photovoltaic industry, today announced that the most significant international agreement to combat climate change Paris Climate Agreement took effect on November 3, a month after 94 countries representing 55% of the world's emissions committed ratified the agreement - and less than a year after negotiators from nearly 200 countries agreed to the specifics of the text at the 2015 U.N. climate summit.

As the world largest solar module producer and one of the leading global solar power plant developers, JinkoSolar has played the role as an advocate of renewable energy and has supported proactive government approaches to achieving the Paris Agreement in every occasion since last year. Mr. Xiande Li, Chairman of JinkoSolar, commented on this landmark agreement, "It is a moment to celebrate, it is also a milestone that the world ends the path to inevitable climate disaster and sets off with determination towards a sustainable future."

"And what does this agreement entering into force mean for companies. The business world should prepare and divert to a low-carbon growth path. If you are investing in carbon reduction and energy efficiency and implementing shifts towards an environmentally friendly portfolio, implementation of the Paris Agreement is a strategic business advantage. Now that the Agreement is in force, countries and companies that embrace and support that reality will thrive; those that don't will be left behind."

"The Paris Agreement has made great headway, and there will be more progress in Morocco at COP22 in November. Although we have a long way to go, I know that many in the business world are well prepared to make the journey to a thriving, low-carbon economy. Nowadays, solar power is undercutting coal fired electricity to become the cheapest, the cleanest and safest power source. Every industrial and commercial rooftop should be used, every idle land could be utilized for solar energy. It is the easiest and most feasible way for companies to fulfill their carbon reduction commitment as well as to drive growth simultaneously. So it will future-proof your climate efforts and ensure your company is not disadvantaged as the rest of the economy decarbonizes. "

### About JinkoSolar Holding Co., Ltd.

JinkoSolar (NYSE: JKS) is a global leader in the solar industry. JinkoSolar distributes its solar products and sells its solutions and services to a diversified international utility, commercial and residential customer base in China, the United States, Japan, Germany, the United Kingdom, Chile, South Africa, India, Mexico, Brazil, the United Arab Emirates, Italy, Spain, France, Belgium, and other countries and regions.
