JinkoSolar Attends IEC's TC82 2017 Plenary Meetings and Chairs WG8 Meeting

May 30, 2017

SHANGHAI, May 30, 2017 /PRNewswire/ -- JinkoSolar Holding Co., Ltd. ("JinkoSolar" or the "Company") (NYSE: JKS), a global leader in the PV industry, today announced that it attended the International Electrotechnical Commission's ("IEC") TC82 Plenary Meetings which was held from May 13-19, 2017 in Nara, Japan. Dr. Jin Hao, Vice President of JinkoSolar, gave opening remarks where he addressed the future of the standardization of solar cells and silicon wafers. As the convener of a working group on solar cells, he chaired a seminar held on May 16 and 17, 2017, during which experts discussed the revision of cell standards.

The IEC/TC82 is a technical organization that specializes in the international standardization of photovoltaic energy-related technologies. It mainly undertakes the drafting, formulation and publication of international standard projects in related fields. Six working groups were convened during the meetings, including Glossary (WG1), non-concentrating modules (WG2), systems (WG3), balance-of-system components (WG6), concentrating modules (WG7) and photovoltaic cells (WG8), as well as several joint working groups. At present, IEC/TC82 has 91 published standards and 70 ongoing projects. IEC standards carry significant authority around the world, which ensure product quality, create industry standards and protect the interests of customers. IEC attracts experts from all over the world to participate in the standard formulation and revision process. It is currently one of the largest standard-setting organizations in the industry.

The meeting was the first international technical seminar held by the IEC/T82 WG8 Working Group since its establishment. Several IEC members from China, U.S., Canada, Switzerland, South Korea, Germany and Japan attended the Plenary Meeting. During the WG8 Working Group meeting, experts discussed IEC60904-11 testing methods for initial light-induced degradation of crystalline silicon solar cell standards, which was jointly developed by JinkoSolar and Suntech. As the first IEC international standard for commercial batteries, the standard is closely followed by domestic and foreign experts. The standard has gone through numerous discussion, verification, and joint comparison and has basically completed the revision.

In his prepared remarks given at the IEC/TC82 Plenary Meetings, Dr. Jin commented, "China is a leader in manufacturing, marketing and technology in the PV industry. Its leadership however is not commensurate with its contribution to international PV standards. Solar cells are distributed in the market as mature products, but the absence of a unified evaluation system has been a problem plaguing the entire industry. In order to better protect the interests of all parties, developing an objective standard is the only way to meet the market's requirements."

About JinkoSolar Holding Co., Ltd.

JinkoSolar (NYSE: JKS) is a global leader in the solar industry. JinkoSolar distributes its solar products and sells its solutions and services to a diversified international utility, commercial and residential customer base in China, the United States, Japan, Germany, the United Kingdom, Chile, South Africa, India, Mexico, Brazil, the United Arab Emirates, Italy, Spain, France, Belgium, and other countries and regions. JinkoSolar has built a vertically integrated solar product value chain, with an integrated annual capacity of 5.0GW for silicon ingots and wafers, 4.0GW for solar cells, and 6.5 GW for solar modules, as of December 31, 2016.

JinkoSolar has over 15,000 employees across its 6 productions facilities in Jiangxi, Zhejiang and Xinjiang Provinces, China, Malaysia, Portugal and South Africa, and 15 overseas subsidiaries across Japan (2), Singapore, India, Turkey, Germany, Italy, Switzerland, United States, Canada, Mexico, Brazil, Chile, Australia and South Africa. JinkoSolar has 18 global sales offices across China (2), United Kingdom, Bulgaria, Greece, Romania, United Arab Emirates, Jordan, Saudi Arabia, Kuwait, Egypt, Morocco, Ghana, Kenya, Costa Rica, Colombia, Brazil and Mexico.
