JinkoSolar Provides Information on a Fire Accident at One of Its Wafer Slicing and Cell Manufacturing Workshops

04/28/2024

SHANGRAO, China, April 28, 2024 /PRNewswire/ -- JinkoSolar Holding Co., Ltd. ("JinkoSolar" or the "Company") (NYSE: JKS), one of the largest and most innovative solar module manufacturers in the world, today provided information on a fire accident that occurred at one of its silicon wafer slicing and solar cell manufacturing workshops in Shanxi Province.

The fire broke out on the afternoon of April 26, 2024, and the Company immediately initiated emergency response procedures and worked with the local fire department to put out the fire. There were no casualties, and the surrounding area and communities were not impacted. The incident is expected to impact the Company's operations and financial results in 2024, and the Company is optimally allocating its wafer and cell production among different manufacturing workshops to minimize disruption to its manufacturing process, ensuring business operation continuity. The Company maintains insurance coverage for properties and manufacturing equipment in the Shanxi Production Base, and has started the process to make the relevant insurance claims. The cause of the fire is currently under investigation.

About JinkoSolar Holding Co., Ltd.

JinkoSolar (NYSE: JKS) is one of the largest and most innovative solar module manufacturers in the world. JinkoSolar distributes its solar products and sells its solutions and services to utility-scale, commercial and residential customers in China, the United States, Japan, Germany, the United Kingdom, Chile, South Africa, India, Mexico, Brazil, the United Arab Emirates, Italy, Spain, France, Belgium, Netherlands, Poland, Austria, Switzerland, Greece and other countries and regions.

JinkoSolar had 14 production facilities globally, 26 overseas subsidiaries in Japan, South Korea, Vietnam, India, Turkey, Germany, Italy, Switzerland, the United States, Mexico, Brazil, Chile, Australia, Canada, Malaysia, the United Arab Emirates, Denmark, Indonesia, Nigeria and Saudi Arabia, and a global sales network with sales teams in China, the United States, Canada, Brazil, Chile, Mexico, Italy, Germany, Turkey, Spain, Japan, the United Arab Emirates, Netherlands, Vietnam and India, as of December 31, 2023.

JinkoSolar Announces First Quarter 2024 Financial Results

04/29/2024

SHANGRAO, China, April 29, 2024 /PRNewswire/ -- JinkoSolar Holding Co., Ltd. ("JinkoSolar" or the "Company") (NYSE: **JKS**), one of the largest and most innovative solar module manufacturers in the world, today announced its unaudited financial results for the first quarter ended March 31, 2024.

First Quarter 2024 Business Highlights

- Leveraging our outstanding N-type technology, extensive global operation network, and advanced integrated capacity structure, module shipments increased 53.3% year-over-year to 19.99 GW, ranking first in the industry.
- N-type module shipments accounted for nearly 80% of all module shipments globally and nearly 50% of module shipments to North America.
- Our order book visibility for 2024 currently exceeds 70%.
- We were recognized as a Tier 1 energy storage provider by Bloomberg New Energy Finance (BNEF).

First Quarter 2024 Operational and Financial Highlights

- Quarterly shipments were 21,907 MW (19,993 MW for solar modules, and 1,914 MW for cells and wafers), down 21.4% sequentially, and up 51.2% year-over-year.
- Total revenues were RMB23.04 billion (US\$3.19 billion), down 29.8% sequentially and down 1.2% year-over-year.
- Gross profit was RMB2.74 billion (US\$378.8 million), down 33.1% sequentially and down 32.3% year-over-year.
- Gross margin was 11.9%, compared with 12.5% in Q4 2023 and 17.3% in Q1 2023.
- Net income attributable to JinkoSolar Holding Co., Ltd.'s ordinary shareholders was RMB 609.4 million (US\$84.4 million), compared with RMB29.3 million in Q4 2023 and RMB788.7 million in Q1 2023.
- Adjusted net income attributable to JinkoSolar Holding Co., Ltd.'s ordinary shareholders, which excludes the impact from (i) a change in fair value of the convertible senior notes, (ii) a change in fair value of long-term investment, and (iii) share based compensation expenses, was RMB470.3 million (US\$65.1 million), compared with adjusted net income attributable to JinkoSolar Holding Co., Ltd.'s ordinary shareholders RMB462.7 million in Q4 2023 and RMB836.4 million in Q1 2023.
- Basic and diluted earnings per ordinary share were RMB2.82 (US\$0.39) and RMB1.34 (US\$ 0.19), respectively. This translates into basic and diluted earnings per ADS of RMB 11.28 (US\$1.56) and RMB5.36 (US\$0.74), respectively.

Mr. Xiande Li, JinkoSolar's Chairman and Chief Executive Officer, commented, "We are pleased to announce that our module shipments grew 53.3% year-over-year to 19.99 GW in the first quarter, ranking first in the industry. Notably, N-type shipments accounted for nearly 80%, solidifying our leading position in the industry. Module prices continued to fall in the first quarter. While the industry average utilization rate declined sharply, we maintained our leading utilization rate at high level, leading the industry. Over 70% of modules were shipped to overseas markets in the first quarter, with a significant sequential increase in the proportion of shipments to Europe and the U.S. Gross margin was 11.9%, flat sequentially. Net income was US\$84.4 million, up 19.8 times sequentially. Adjusted net income to JinkoSolar Holding Co., Ltd.'s ordinary shareholders was US\$65.1 million, up 1.6% sequentially.

Newly added installations in China reached 45.7 GW, an increase of 35.9% year-over-year. Module exports totaled 61.7 GW, an increase of over 20% year-over-year. The PV industry remained one of the few sectors maintaining a high growth rate, and we expect global PV demand to grow approximately 25%-30% in 2024. While polysilicon prices continued to decline in the second quarter with supply surpassing demand, module prices remained relatively stable due to increases in the cost of some materials. We expect the profitability of integrated solar companies to come under pressure in the short term, and the impact on different companies varies depending on their specific operational capabilities. As a result, we believe overall production capacity in our industry will shrink with the elimination of weaker players that lack market competitiveness, sustainable production capabilities, and the ability to regularly upgrade and iterate technology.

In responses to pressure along the industry chain, we continue to deploy new technologies to improve the mass-produced efficiency of TOPCon cells and module output while reducing costs through optimization of supply chain and production process. We are accelerating the phasing out of our P-type capacity and expect our N-type capacity to exceed 90% of total capacity by the end of 2024 and our advanced capacity structure to continue to lead the industry.

We have the largest overseas integrated capacity in the industry and continuously work to expand the global industry chain. Our 1GW N-type module capacity in the U.S. has started production and another 1GW is expected to start production in the second quarter of 2024. With the strength of our global operations and long accumulated experience in risk management, we are confident in our ability to quickly adapt to changes in international trade and continue to deliver premium products and services to our global clients.

According to the latest predictions by the International Energy Agency (IEA), solar PV and wind will account for 95% of global renewable expansion and by 2028, the share of wind and solar PV in global electricity generation will double to 25%. Meanwhile, the declining cost of solar+storage will continue to improve the economics of investing in PV storage projects. We strongly believe that solar+storage will become the major model for future growth in electricity generation and are confident we will continue to lead the industry with advanced technologies and premium high-efficiency products.

We expect module shipments to be between 24.0 GW and 26.0 GW for the second quarter of 2024, and between 100.0 GW and 110.0 GW for the full year 2024, with N-type modules accounting for nearly 90% of total module shipments. We expect our annual production capacity for mono wafers, solar cells and solar modules to reach 120.0 GW, 110.0 GW and 130.0 GW, respectively, by the end of 2024. By then, we believe the mass-produced N-type cell efficiency will have reached 26.5%.

First Quarter 2024 Financial Results

Total Revenues

Total revenues in the first quarter of 2024 were RMB23.04 billion (US\$3.19 billion), a decrease of 29.8% from RMB32.83 billion in the fourth quarter of 2023 and a decrease of 1.2% from RMB23.33 billion in the first quarter of 2023. The sequential decrease was mainly due to a decrease in the shipment of solar modules, and the year-over-year decrease was mainly due to a decrease in the average selling price of solar modules.

Gross Profit and Gross Margin

Gross profit in the first quarter of 2024 was RMB2.74 billion (US\$378.8 million), compared with RMB4.09 billion in the fourth quarter of 2023 and RMB4.04 billion in the first quarter of 2023.

Gross margin was 11.9% in the first quarter of 2024, compared with 12.5% in the fourth quarter of 2023 and 17.3% in the first quarter of 2023. The sequential and year-over-year decreases were mainly due to the decreases in the average selling price of solar modules.

(Loss)/Income from Operations and Operating Margin

Loss from operations in the first quarter of 2024 was RMB339.6 million (US\$47.0 million), compared with RMB352.5 million income from operations in the fourth quarter of 2023 and RMB1.21 billion income from operations in the first quarter of 2023. The changes were primarily attributable to the decreases in our revenues and gross margin in the first quarter of 2024.

Operating loss margin was 1.5% in the first quarter of 2024, compared with 1.1% operating profit margin in the fourth quarter of 2023 and 5.2% operating profit margin in the first quarter of 2023.

Total operating expenses in the first quarter of 2024 were RMB3.07 billion (US\$425.8 million), a decrease of 17.8% from RMB3.74 billion in the fourth quarter of 2023 and an increase of 8.7% from RMB2.83 billion in the first quarter of 2023. The sequential decrease was mainly due to (i) the decrease in the shipment of solar modules and (ii) expenses in relation to settlement of a dispute with one of our customers that we recorded in the fourth quarter of 2023. The year-over-year changes were relatively flat.

Total operating expenses accounted for 13.3% of total revenues in the first quarter of 2024, compared to 11.4% in the fourth quarter of 2023 and 12.1% in the first quarter of 2023.

Interest Expenses, Net

Net interest expenses consist of interest expenses of RMB281.7 million (US\$39.0 million) and interest income of RMB94.9 million (US\$13.1 million) in the first quarter of 2024.

Net interest expenses decreased by 9.1% from RMB205.6 million in the fourth quarter of 2023 to RMB186.8 million (US\$25.9 million) in the first quarter of 2024. The sequential change was due to an increase in interest income. Net interest expenses increased by 237.3% from RMB55.4 million in the first quarter of 2023 to RMB186.8 million (US\$25.9 million) in the first quarter of 2024. The year-over-year increase was mainly due to the decrease in interest income.

Subsidy Income

Subsidy income in the first quarter of 2024 was RMB231.8 million (US\$32.1 million), compared with RMB554.6 million in the fourth quarter of 2023 and RMB264.0 million in the first quarter of 2023. The sequential and year-over-year changes were mainly attributable to the changes in the cash receipt of incentives to the Company's business operations.

Exchange Gain/Loss and Change in Fair Value of Foreign Exchange Derivatives

The Company recorded a net exchange gain (including change in fair value of foreign exchange derivatives) of RMB139.7 million (US\$19.4 million) in the first quarter of 2024, compared to a net exchange gain of RMB76.3 million in the fourth quarter of 2023 and a net exchange loss of RMB73.7 million in the first quarter of 2023. The sequential and year-over-year changes were mainly attributable to the exchange rate fluctuation of US dollars against RMB in the first quarter of 2024.

Change in Fair Value of Convertible Senior Notes

The Company issued US\$85.0 million of 4.5% convertible senior notes (the "Notes") due 2024 in May 2019 and has elected to measure the Notes at fair value derived by valuation model, i.e. Binomial Model.

The Company recognized a gain from a change in fair value of the convertible senior notes of RMB310.7 million (US\$43.0 million) in the first quarter of 2024, compared to a loss of RMB155.1 million in the fourth quarter of 2023 and a loss of RMB261.4 million in the first quarter of 2023. The changes were primarily due to the changes in the Company's stock price in the first quarter of 2024.

Change in Fair Value of Long-term Investment

The Company invested in certain equity interests in several solar technology companies engaged in the photovoltaic industry chain. As of March 31, 2024, the Company had RMB967.0 million (US\$133.9 million) in long-term investment, compared with RMB1.02 billion as of December 31, 2023.

The Company recognized a loss from change in fair value of RMB55.3 million (US\$7.7 million) in the first quarter of 2024, compared with a loss of RMB90.9 million in the fourth quarter of 2023 and a gain of RMB440.4 million in the first quarter of 2023. The changes were primarily due to the changes in the valuation of several solar technology companies that we invested in.

Other income, net

Net other income in the first quarter of 2024 was RMB1.32 billion (US\$183.3 million), compared with net other loss of RMB10.8 million in the fourth quarter of 2023 and net other income of RMB3.1 million in the first quarter of 2023. The sequential and year-over-year changes were mainly due to income generated from the disposition of a wholly-owned subsidiary in the first quarter of 2024.

Equity in Earnings of Affiliated Companies

The Company indirectly holds a 20% equity interest in Sweihan PV Power Company P.J.S.C, a developer and operator of solar power projects in Dubai, and a 9% equity interest in Xinte Ltd, a domestic silicon material supplier, and both are accounted for using the equity method. The Company recorded equity in earnings of affiliated companies of RMB13.2 million (US\$1.8 million) in the first quarter of 2024, compared with gain of RMB2.4 million in the fourth quarter of 2023 and gain of RMB180.0 million in the first quarter of 2023. The fluctuation of equity in earnings of affiliated companies primarily arose from the net gain or loss incurred by the affiliate companies.

Income Tax Expense

The Company recorded an income tax expense of RMB476.7 million (US\$66.0 million) in the first quarter of 2024, compared with RMB200.8 million in the fourth quarter of 2023 and RMB315.0 million in the first quarter of 2023.

Net Income attributable to Non-Controlling Interests

Net income attributable to non-controlling interests amounted to RMB351.0 million (US\$48.6 million) in the first quarter of 2024, compared with RMB293.3 million in the fourth quarter of 2023 and RMB605.1 million in the first quarter of 2023. The sequential and year-over-year changes were mainly attributable to the changes in net income of the Company's majority-owned principal operating subsidiary, Jinko Solar Co., Ltd..

Net Income and Earnings per Share

Net income attributable to the JinkoSolar Holding Co., Ltd.'s ordinary shareholders was RMB609.4 million (US\$84.4 million) in the first quarter of 2024, compared with RMB29.3 million in the fourth quarter of 2023 and RMB788.7 million in the first quarter of 2023. Excluding the impact from (i) a change in fair value of the convertible senior notes, (ii) a change in fair value of the long-term investment, and (iii) share based compensation expenses, was RMB470.3 million (US\$65.1 million), compared with adjusted net income attributable to JinkoSolar Holding Co., Ltd.'s ordinary shareholders RMB462.7 million in the fourth quarter of 2023 and RMB836.4 million in the first quarter of 2023.

Basic and diluted earnings per ordinary share were RMB2.82 (US\$0.39) and RMB1.34 (US\$0.19), respectively, in the first quarter of 2024, compared to RMB0.14 and RMB0.14, respectively, in the fourth quarter of 2023, and RMB3.91 and RMB3.74, respectively, in the first quarter of 2023. As each ADS represents four ordinary shares, this translates into basic and diluted earnings per ADS of RMB11.28 (US\$1.56) and RMB5.36 (US\$0.74), respectively in the first quarter of 2024; basic and diluted earnings per ADS of RMB0.56 and RMB0.54, respectively, in the fourth quarter of 2023; and basic and diluted earnings per ADS of RMB15.62 and RMB14.95, respectively, in the first quarter of 2023.

Financial Position

As of March 31, 2024, the Company had RMB17.63 billion (US\$2.44 billion) in Cash, cash equivalents, and restricted cash, compared with RMB19.07 billion as of December 31, 2023.

As of March 31, 2024, the Company's accounts receivables were RMB19.82 billion (US\$2.74 billion), compared with RMB22.96 billion as of December 31, 2023.

As of March 31, 2024, the Company's inventories were RMB20.13 billion (US\$2.79 billion), compared with RMB18.22 billion as of December 31, 2023.

As of March 31, 2024, the Company's total interest-bearing debts were RMB26.46 billion (US\$3.66 billion), compared with RMB31.10 billion as of December 31, 2023.

First Quarter 2024 Operational Highlights

Solar Module, Cell and Wafer Shipments

Total shipments were 21,906 MW in the first quarter of 2024, including 19,993 MW for solar module shipments and 1,914 MW for cell and wafer shipments.

Operations and Business Outlook Highlights

We are optimistic about global market demand and the opportunities brought by the increasing penetration of N-type technology. We will continue to maintain our leading position in N-type modules through technology iteration, improvement in mass production capability, and cost optimization. By the end of 2024, we expect mass-produced N-type cell efficiency to reach 26.5%. The proportion of N-type modules shipments in our total module shipments is expected to reach nearly 90% in 2024, as we anticipate strong demand for high-efficiency products from a growing number of markets and customers.

Taking into account supply chain and market conditions, we are reducing investments in capacity expansion in 2024. We are focusing on expanding our advanced N-type capacity, including 28 GW of integrated capacity in our Shanxi plant in China. We continue to focus on improving working capital efficiency and achieving sustainable growth in operating cash flow.

Second Quarter and Full Year 2024 Guidance

The Company's business outlook is based on management's current views and estimates with respect to market conditions, production capacity, the Company's order book and the global economic environment. This outlook is subject to uncertainty on final customer demand and sale schedules. Management's views and estimates are subject to change without notice.

For the second quarter of 2024, the Company expects its module shipments to be in the range of 24.0 GW to 26.0 GW.

For full year 2024, the Company estimates its module shipments to be in the range of 100.0 GW to 110.0 GW.

Solar Products Production Capacity

JinkoSolar expects its annual production capacity for mono wafer, solar cell and solar module to reach 120.0 GW, 110.0 GW and 130.0 GW, respectively, by the end of 2024.

Recent Business Developments

- In April 2024, JinkoSolar was awarded the Top Brand PV USA seal by EUPD Research.
- In April 2024, JinkoSolar announced that its subsidiary signed a purchase agreement with Nyox Srl, a leading renewable energy solutions provider based in Italy, to supply 100MW Tiger Neo modules
- In April 2024, JinkoSolar secured the top position in PV Tech's 2024 Q1 ModuleTech Bankability Report with an AAA rating.
- In April 2024, JinkoSolar provided information on a fire accident at one of its wafer slicing and cell manufacturing workshops.

Conference Call Information

JinkoSolar's management will host an earnings conference call on Monday, April 29, 2024 at 8:30 a.m. U.S. Eastern Time (8:30 p.m. Beijing / Hong Kong the same day).

Please register in advance of the conference using the link provided below. Upon registering, you will be provided with participant dial-in numbers, passcode and unique access PIN by a calendar invite.

Participant Online Registration: <https://s1.c-conf.com/diamondpass/10038581-hgu87y.html>

It will automatically direct you to the registration page of "JinkoSolar First Quarter 2024 Earnings Conference Call", where you may fill in your details for RSVP.

In the 10 minutes prior to the call start time, you may use the conference access information (including dial-in number(s), passcode and unique access PIN) provided in the calendar invite that you have received following your pre-registration.

A telephone replay of the call will be available 2 hours after the conclusion of the conference call through 23:59 U.S. Eastern Time, May 6, 2024. The dial-in details for the replay are as follows:

International: +61 7 3107 6325
U.S.: +1 855 883 1031
Passcode: 10038581

Additionally, a live and archived webcast of the conference call will be available on the Investor Relations section of JinkoSolar's website at <http://www.jinkosolar.com>.

About JinkoSolar Holding Co., Ltd.

JinkoSolar (NYSE: **JKS**) is one of the largest and most innovative solar module manufacturers in the world. JinkoSolar distributes its solar products and sells its solutions and services to a diversified international utility, commercial and residential customer base in China, the United States, Japan, Germany, the United Kingdom, Chile, South Africa, India, Mexico, Brazil, the United Arab Emirates, Italy, Spain, France, Belgium, Netherlands, Poland, Austria, Switzerland, Greece and other countries and regions.

JinkoSolar had 14 productions facilities globally, 26 overseas subsidiaries in Japan, South Korea, Vietnam, India, Turkey, Germany, Italy, Switzerland, the United States, Mexico, Brazil, Chile, Australia, Canada, Malaysia, the United Arab Emirates, Denmark, Indonesia, Nigeria and Saudi Arabia, and a global sales network with sales teams in China, the United States, Canada, Brazil, Chile, Mexico, Italy, Germany, Turkey, Spain, Japan, the United Arab Emirates, Netherlands, Vietnam and India, as of March 31, 2024.

JinkoSolar Repurchased 4,203,178 ADSs under Its Share Repurchase Program

04/29/2024

SHANGRAO, China, April 29, 2024 /PRNewswire/ -- JinkoSolar Holding Co., Ltd. ("JinkoSolar" or the "Company") (NYSE: **JKS**), one of the largest and most innovative solar module manufacturers in the world, today announced that as of the date of this press release, the Company has repurchased a total of 4,203,178 ADSs in an aggregate amount of approximately US\$104.1 million in the open market under its share repurchase program announced in July 2022 and the extended share repurchase program announced in December 2023.

On December 20, 2023, the Company extended its share repurchase program announced on July 6, 2022 for an additional 18-month period through June 30, 2025. As of the date of this press release, approximately US\$95.9 million of the Company's ordinary shares represented by the ADSs under the extended share repurchase program had not been utilized.

The Company may continue to repurchase its ADSs through open-market transactions, privately negotiated transactions or block trades, and/or other legally permissible means, depending on market conditions and in accordance with the applicable rules and regulations. The timing and conditions of the share repurchases will be subject to various factors including the requirements under Rule 10b-18 and Rule 10b5-1 of the Securities Exchange Act of 1934, as well as the Company's insider trading policy.

About JinkoSolar Holding Co., Ltd.

JinkoSolar (NYSE: **JKS**) is one of the largest and most innovative solar module manufacturers in the world. JinkoSolar distributes its solar products and sells its solutions and services to utility-scale, commercial and residential customers in China, the United States, Japan, Germany, the United Kingdom, Chile, South Africa, India, Mexico, Brazil, the United Arab Emirates, Italy, Spain, France, Belgium, Netherlands, Poland, Austria, Switzerland, Greece and other countries and regions.

JinkoSolar had 14 production facilities globally, 26 overseas subsidiaries in Japan, South Korea, Vietnam, India, Turkey, Germany, Italy, Switzerland, the United States, Mexico, Brazil, Chile, Australia, Canada, Malaysia, the United Arab Emirates, Denmark, Indonesia, Nigeria and Saudi Arabia, and a global sales network with sales teams in China, the United States, Canada, Brazil, Chile, Mexico, Italy, Germany, Turkey, Spain, Japan, the United Arab Emirates, Netherlands, Vietnam and India, as of March 31, 2024.
