**Section 1. Conflict Minerals Disclosure**

**Item 1.01. Conflict Minerals Disclosure and Report**

**Conflict Minerals Disclosure**

JinkoSolar Holding Co., Ltd. (“JinkoSolar”) is one of the largest and most innovative solar module manufacturers in the world. JinkoSolar distributes its solar products and sells its solutions and services to a diversified international utility, commercial and residential customer base in China, the United States, Japan, Germany, the United Kingdom, Chile, South Africa, India, Mexico, Brazil, the United Arab Emirates, Italy, Spain, France, Belgium, and other countries and regions. JinkoSolar has built a vertically integrated solar product value chain, with an integrated annual capacity of 15.0 GW for silicon wafers (including 11.5 GW for mono wafers), 10.6 GW for solar cells and 16.0 GW for solar modules, as of December 31, 2019.

JinkoSolar has over 15,000 employees across its 7 production facilities globally, 14 oversea subsidiaries in Japan, South Korea, Vietnam, India, Turkey, Germany, Italy, Switzerland, United States, Mexico, Brazil, Chile and Australia, and global sales teams in China, United Kingdom, France, Spain, Bulgaria, Greece, Ukraine, Jordan, Saudi Arabia, Tunisia, Morocco, Kenya, South Africa, Costa Rica, Colombia, Panama, Kazakhstan, Malaysia, Myanmar, Sri Lanka, Thailand, Vietnam, Poland and Argentina.

The disclosures set forth herein for the reporting period from January 1, 2019 to December 31, 2019 are presented to comply with Rule 13p-1 under the Securities Exchange Act of 1934, as amended. According to section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act and the definition in the Form SD and for the purposes of this assessment, “conflict minerals” are defined as columbite-tantalite (coltan), cassiterite, gold, wolframite, and their derivatives, which are limited to tantalum, tin and tungsten.

***Description of Reasonable Country of Origin Inquiry***

JinkoSolar has taken the following steps as part of its reasonable country of origin inquiry to determine whether any conflict minerals may have originated in the Democratic Republic of the Congo or an adjoining country:

- Prepared a list of the materials used during the production of its products;
- Determined whether any conflict minerals were necessary to the functionality or production of products manufactured or contracted to be manufactured by JinkoSolar (“necessary conflict minerals”);
- Identified the suppliers whose products contained necessary conflict minerals (“Suppliers in Concern”);
- Requested that the Suppliers in Concern provide a statement on where they obtained their products and materials that contained conflict minerals and the origin for these products and materials; and
- Analyzed whether the necessary conflict minerals used by JinkoSolar during the reporting period may have originated in the Democratic Republic of the Congo or an adjoining country or whether they were from scrap or recycled sources.

JinkoSolar determined that during the reporting period, the conflict minerals necessary to the functionality or production of products that it manufactures or contracts to be manufactured were tin and tungsten.

- Tin-coated copper ribbon and solder wire used in the production of solar modules use tin. JinkoSolar has made inquiries with all its suppliers of tin-coated copper ribbon and solder wire about the source of the tin used in their products and further requested that these suppliers provide confirmation of origin for the tin contained in their products.
- Tungsten wire rope, tungsten hammer and crusher plate used in the production of silicon ingots use tungsten. JinkoSolar has made inquiries with all its suppliers of tungsten wire rope, tungsten hammer and crusher plate about the source of the tungsten used in their products and further requested that these suppliers provide confirmation of origin for the tungsten contained in their products.

JinkoSolar does not make purchases of raw ore or unrefined conflict minerals and makes no purchases in the Democratic Republic of the Congo or adjoining countries.

***Determination***

Based on JinkoSolar's reasonable country of origin inquiry, JinkoSolar has no reason to believe that its necessary conflict minerals may have originated in the Democratic Republic of the Congo or an adjoining country.
